

8) page implicit object:

 javatpoint.com/page-implicit-object

In JSP, page is an implicit object of type Object class. This object is assigned to the reference of auto generated servlet class. It is written as:

Object page=this;

For using this object it must be cast to Servlet type. For example:

<% (HttpServletRequest)page.log("message"); %>

Since, it is of type Object it is less used because you can use this object directly in jsp. For example:

<% this.log("message"); %>
